

## Green Home Grants Scheme

Applications are now open for Green Homes Grant vouchers to help towards the cost of installing energy efficiency measures in your home, such as insulation or low carbon heating. This government funded scheme is only available in England and runs until 31<sup>st</sup> March 2022.

**If you live in Derby & Derbyshire**, you can call us on 0800 677 1332 for help and advice. However, please only contact us if you are really struggling to access the scheme, and do not have friends or family to provide assistance. We are extremely busy at this time but will endeavour to support those that need our help.

### How do I apply?

- 1) Check your eligibility and generate a list of qualifying measures for your home here:  
<https://www.simpleenergyadvice.org.uk/green-homes-grant/questionnaire>
- 2) Contact a Green Homes Grant registered contractor, accredited by TrustMark to obtain a quote.
  - A Directory of installers compiled by Marches Energy Agency can be found below
  - Alternatively search by your post code at one of the following websites:  
<https://www.trustmark.org.uk/find-a-tradesman>  
<https://www.simpleenergyadvice.org.uk/installer-search>
- 3) Apply for Green Homes Grant vouchers online here:  
<https://green-homes-grant.service.gov.uk/homeowner-and-landlord-application>
- 4) Redeem Green Homes Grant vouchers here:  
<https://www.gov.uk/redeem-green-homes-grant-voucher>

For those without internet or who find it difficult to do things online, it is possible for someone to apply online on your behalf; you would receive a paper form by post within 10 working days.

### Am I eligible? How much is available?

Are you on a low income/ in receipt of benefits?

**No**

**Yes**

**Two thirds of the total cost, up to a maximum of £5,000, for:**

- owner-occupied homes;
- park homes (including Gypsy and Traveller sites);
- long-leasehold and shared ownership homes;
- landlords of private rented and social domestic housing. Renters can ask their landlord to apply and make improvements.

**100% of the cost, up to £10,000 for:**

Home or park homeowners only, not landlords, where residents receive at least one income-based or disability benefit:

- income-based/contribution-based jobseeker's allowance
- income-based/contribution-based employment and support allowance
- income support
- pension 'guarantee' credit
- working tax credit
- child tax credit
- universal credit
- disability living allowance
- personal independence payment
- attendance allowance
- carer's allowance
- severe disablement allowance
- industrial injuries disablement benefit
- housing benefit.

What can be installed?

**PRIMARY measures**

At least one of the following measures must be installed to qualify for support with the vouchers. Vouchers can be used to 'top up' certain measures e.g. loft insulation but cannot be used to *replace* any existing measures.

<p><u>Insulation</u></p> <ul style="list-style-type: none"> <li>• solid wall insulation (internal or external)</li> <li>• cavity wall insulation</li> <li>• under-floor insulation (solid floor, suspended floor)</li> <li>• loft insulation</li> <li>• flat roof insulation</li> <li>• pitched roof insulation</li> <li>• room in roof insulation</li> <li>• insulating a park home</li> </ul>	<p><u>Low carbon heat</u></p> <ul style="list-style-type: none"> <li>• air source heat pump</li> <li>• ground source heat pump</li> <li>• solar thermal (liquid filled flat plate or evacuated tube collector)</li> <li>• biomass boiler</li> <li>• hybrid heat pump</li> </ul>
---	---

**SECONDARY measures**

- You will only be able to *redeem* vouchers for secondary measures once you have installed and redeemed a voucher for at least one primary measure.
- The cost of secondary measures can equal, but not exceed, the cost of the primary measure/s installed, therefore **it is very unlikely that the voucher would cover the cost of double glazing for an entire house.**

<ul style="list-style-type: none"> <li>• Draught-proofing</li> <li>• Double/triple/secondary glazing <u>if you currently have single glazing</u></li> <li>• Energy efficient doors, to replace single-glazed or solid doors installed before 2002.</li> <li>• Heating controls and insulation - hot water tank thermostats, hot water tank insulation, appliance thermostats, smart heating controls, zone controls, intelligent delayed-start thermostats, and thermostatic radiator valves.</li> </ul>
--

What further help is available?

A contractor Directory and some common FAQs are provided below.

The UK Government website provides advice and a link to applying for the voucher:

<https://www.gov.uk/guidance/apply-for-the-green-homes-grant-scheme>

The Simple Energy Advice website allows you to create a package of measure for your home:

<https://www.simpleenergyadvice.org.uk/green-homes-grant/questionnaire>

Full terms and conditions for the scheme are available here:

<https://green-homes-grant.service.gov.uk/customer-terms-and-conditions>

If you can, please help neighbours and vulnerable people in your local area access the scheme. This will make sure we reach as many vulnerable people as possible.

## Green Home Grants Scheme – Contractor Directory

The following Directory provides details about contractors, operating in Derbyshire and Nottinghamshire, who offer eligible Green Homes Grant (GHG) measures and vouchers for residents.

Details of which measures each contractor can install, and their accreditation levels are provided in the Directory.

Trustmark – is the Government Endorsed Quality Scheme covering work a consumer chooses to have carried out in or around their home. TrustMark Registered Businesses have been vetted to meet required standards and have made a considerable commitment to good customer service, technical competence, and trading practices. <https://www.trustmark.org.uk/>

MCS – is a standard for installing certain renewable energy technologies. Contractors that are MCS certified are technically safe and competent and use equipment that meets good standards of performance. <https://mcs-certified.com/>

**This list is not a formal recommendation by Marches Energy Agency, but includes those contractors which have responded to us, to say they are happy to be contacted about installing GHG measures.**

Further contractors can be found by searching using your post code at the following links:

<https://www.trustmark.org.uk/find-a-tradesman>

<https://www.simpleenergyadvice.org.uk/installer-search>

### **NB – Ensure your quotes contain sufficient information.**

A common reason for applications not meeting the requirements is due to quotes not containing the correct information. The quote you receive from your installer should include:

- Business name and contact details
- Company registration and VAT numbers (if applicable)
- Your name/address/contact details
- Full breakdown of works, including enabling works (e.g. scaffolding, lowering of the level of ground water) including costs
- Any guarantee/warranty you will be providing
- Payment terms (how/when will customer have to pay)
- How long the job will take (hours)
- Total price (incl. VAT for domestic customers)
- Any delivery costs
- Any deposit needed
- Details of stage payments (if agreed)
- Any access needed (e.g. to water/electricity)

All Seasons Interiors Limited	
Over ten years' of experience installing home efficiency improvements, specialising in heating systems and insulation. Based in Sheffield, South Yorkshire, our large team of quality accredited installers serve customers across England, Wales and Scotland, and employ the latest materials and methods. We offer a reliable and professional service, providing our customers with expert advice and assistance from the initial survey through to design and completion.

## FAQs

### Does the voucher cover enabling works?

Certain enabling works are covered. These include:

- Professional services such as detailed design drawings and modelling to evaluate moisture risk;
- Contractor costs such as labour and materials, scaffolding and VAT;
- Work to support the retrofit such as necessary structural improvements;
- Low carbon heating pipework, pumps and valves, and fittings.

### What is not covered?

- Solar PV systems
- Fossil fuel heating system replacements (e.g. boiler replacement/repair).
- Newly built homes that have not previously been occupied.
- Professional services such as EPCs or works that are not linked to an energy efficiency retrofit;
- Building work for retrofit measures not identified in the Green Homes Grant voucher scheme;
- Contractor training costs; asbestos removal; additional building insurance premiums or certification fees;
- Insulation for new extensions built to current building standards; extensions built without permission or without fixed heating; outbuildings; and conservatories without fixed heating;
- Householder costs such as furniture storage or alternative accommodation costs during disruption.

### How many quotes do I need?

Only 1 quote from a Green Homes Grant registered, Trustmark accredited installer is required in order to apply for a voucher. You will need to upload a copy of the quote to the website when you apply. We recommend residents obtain a minimum of 2 quotes.

### Do I have to use just one contractor?

No, you can use different contractors if you are planning a variety of different measures. Quotes would be required from each contractor and uploaded to the website.

### When can the contractor start work?

Once your voucher has been issued, the installer can begin the work. Any work that was started before that date cannot be claimed.

You may be asked for a deposit by the installer, but it cannot be larger than your expected contribution to the cost of measures. If you're applying under the low-income scheme, then your installer cannot ask you for a deposit unless the cost of your measures is more than £10,000.

### Do I have to apply for primary and secondary measures at the same time?

Primary measures must be applied for first, and it's sensible to apply for everything at the same time. However, you can apply for secondary measures at a later date; you'll need the reference number from your primary measures to do so.

### **How do I redeem my voucher/s?**

To redeem your voucher, you'll need to confirm that:

- the installation was completed satisfactorily before the voucher expiry date
- you have received the necessary documents from the installer
- you have paid your share of the costs to the installer (if applicable)
- you meet the relevant eligibility requirements
- You will need to provide a dated copy of the invoice issued by the installer

When you redeem your voucher, the grant will be paid on your behalf directly to the installer.

### **Is there a deadline for getting the work done?**

Yes, the vouchers expire 3 months after their date of issue and before 31<sup>st</sup> March 2022. Works must have been completed, relevant documents submitted, and the voucher redeemed before then.

### **What guarantees do I have regarding workmanship?**

Installers must be registered as Green Homes Grants contractors and also be TrustMark accredited; this is to try and ensure a high level of workmanship and that contractors understand the grant process. Installers should, within 14 days of the installation (and no later than 7 days before the voucher expires), issue you with the relevant guarantee and conformity documents for the measures you have had, for example low carbon heating systems require a Microgeneration Certification Scheme (MCS) certificate. Any documentation you receive should be kept for a minimum of 6 years (10 years for landlords).

### **I'm a landlord, can I apply?**

Yes, landlords can apply for the scheme capped at £5,000 but not the low income scheme. As above, you should keep hold of all post installation documentation for 10 years. If you have been given a UIN by the Scheme Administrator, you must include it in each application for a Voucher.

### **I'm a tenant, can I apply?**

No, but you can fill in the questionnaire at Simple Energy Advice to see what measures may be suitable for your home and then discuss these with your landlord and encourage them to apply.

### **My existing solar thermal/biomass boiler/air source heat pump needs repairing, can I use the vouchers for that?**

No, the scheme is only for completely new measures or systems, not for repair or replacement of parts of an existing measure or system and not for purchasing second-hand systems. It is however, possible to apply for top ups e.g. to loft insulation.

### **If I get low carbon heating installed, can I also receive Renewable Heat Incentive (RHI) payments?**

The RHI payments would be reduced as a result. You should first "redeem" the Green Homes Grant voucher, then apply to Ofgem for accreditation of the heating system under the RHI scheme, notifying Ofgem about the amount of Grant paid. If the RHI accreditation is successful Ofgem will deduct the relevant amount of Grant from the RHI payments.

### **Are there any post installation obligations?**

Yes – for a period of 12 months following voucher redemption, the installed measure cannot be moved or modified. For the lifetime of low carbon heating systems - these must be serviced in line with manufacturer's instructions, and for biomass boilers only authorised fuel used.
